Subject: H6151 Bill - Wireless Telecommunication Act

I, Laurie Ludwig, of 28 Burgate St., Glocester, RI 02814 do adamantly **OPPOSE** the H6151 (Wireless Telecommunication) bill. This is not a "my highway or the highway" stance. This is a plea to all members of the State's legislature to start critically thinking about this issue, along with all others that have been passed or are in the pipeline, that will directly affect my, every Rhode Islander and even your own health and well-being. These bills are, have been or will be acted upon by you (supposedly on our behalf) without all pertinent information being disseminated to any of us. Unfortunately, in this new Public/Private Corporate Stakeholder System that we are now under, and, not the Democrat Republic as outlined by the Constitution, and that you took an oath to uphold, we are being spoon fed only the narrative that benefits "this one hand washes the other" power structure (i.e. The Telecommunication Industry/Lobbyists and the Government) in this case.

Please do me, yourselves, every Rhode Islander and future generations a favor and become educated on this and all other pertinent matters thoroughly before you unknowingly sell out all of our God given rights.

Sincerely,

Laurie Ludwig
