To the Education committee
From MaryKae Wright in support of bill #5604

I am writing to urge you to support this bill requiring courses on family life and sex education be taught in grades 6 - 12. I think it is time for our schools to update the information taught in our schools to reflect the changes in our culture and the growing acceptance of people with different sexual orientations and gender identities. Children must have the opportunity to develop into adulthood with affirmation of who they are and without bias and discrimination for the biological differences they are born with. Many children do not have parents to teach them accurately, if at all, about the realities of sex and gender identity, information they can get in schools with fact-based curriculum in their classrooms.

Please vote yes to approve this bill.
