To Chairman Bennett & members of the committee,

I hope you will strongly support a great bill from Rep. McGaw to include carbon-emissions reduction goals in the proceedings of the EFSB. Frankly how this isn't already law over an agency overseeing energy plant siting is completely bewildering. As climate change poses an existential threat to communities all over Rhode Island but particularly to coastal/island areas like Warwick, Cranston, South Kingstown, as well as the East Bay and Aquidneck Island regions, many of which are represented on this committee. The very real threat should be taken under consideration for nearly any type of development during these times, especially when it comes to the siting of energy infrastructure.

Thank You,

Jordan Goyette
