**Subject:** Historic Tax Credits

I am writing from Greenvale Farm and Vineyards in Portsmouth RI. The Farm now Vineyard is on the State and National Registers of Historic Places and was built by my ancestor John Barstow in 1863.

As many of you know, the National Register of Historic Places started a program 25 years ago called Preservation Works. It cited the importance of maintaining historic properties because historic properties are not only important to maintain for their historic value but are an excellent economic engine as we have seen in so many places in RI and our neighboring states.

Please repeal the sunset clause and allow tax credits to continue in perpetuity to encourage the restoration of historic buildings.

Sorry to not be able to attend the hearing. Here's to the future!

Nancy Parker Wilson  
General Manager and Owner  
Greenvale Vineyar
