Subject: Internet access support

My name is Diane Myers and I am a resident of Portsmouth Rhode Island. I am in support of Bill H5148 and H5054.

With all of the recent need for Internet across our state and the world. Internet has become a need and not just for those who can afford it. We need to have a regulation and it needs to be considered a utility just like electricity.

Thank you so much for considering these bills. This is very important as we move forward.

Thank you,
Diane Myers
