

To Chairman Hull & members of the committee,

I would like to urge your support of Rep. Ackerman's bill H 5632 to classify tiny homes as accessory dwellings. Currently these dwellings are only available to family members of the main property owner, and it only makes sense during a bleak housing crisis to change that law to allow anyone to rent these homes. I think this bill is a small measure as part of a larger piecemeal approach and should be followed up by stronger efforts to build more single-family affordable housing units, but I hope you will swiftly vote this bill out of committee to the floor.

Thank You,

Jordan Goyette
