Subject: testimony in support of H-7015 as drafted

As a Registered electrician apprentice in Rhode Island I am looking forward to my future to a future where I am able to support a family. A future where I can sleep at night knowing I will have the ability to work the next morning. A future where I can use my skills and knowledge to help build up Rhode Island. My profession is in danger. I have made the decision to become an electrician the proper way without taking shortcuts so that I can do the best work possible. Building up Rhode Island safely. This bill will help regulate the work electricians who have a proper education and the knowledge to do electrical work safely. This will make a better safer Rhode Island for everyone.
