Subject: Bills H-5816 / S-0769

Hi, My name is Camille Nixon of 70 Bradford St. in Warren, RI 02885. Thanks for your part in passing these bills: H-5816 and S-0769. Please accept my approval of these bills.

Rhode Island is falling behind in offshore wind development and if we don't get some strong backing of legislation to bring RI up to speed on offshore wind targets, we won't meet our Act on Climate goals of reducing emissions of 45% by 2030. This is frightening to me as a grandmother. We want our children and grandchildren to live in a safe environment.

We need offshore wind to help offset our reliance on fossil fuels which have been responsible for the horrible state of our climate.

Offshore wind and solar work together to produce crucial energy. Wind is stronger at night and solar in the day. They are sympathetic sources of energy, each working best when the other needs help.

Since wind and solar offer secure and reliable energy to meet our growing needs, we depend on these technologies to secure our independence from polluting fossil fuels.

Please help our state to take very seriously our commitment to doing our part in helping to protect our planet.

Please pass these bills to keep RI in the forefront of fighting climate change.

Respectfully submitted,

Camille Nixon
