

Rep. Joseph Solomon, Chair
House Corporations Committee
RI House of Representatives

OPPOSITION TO H6203 Repeal of Renewable Energy Growth Program

May 29, 2025

Dear Chair Solomon and Members of the Committee,

Rhode Island's Renewable Energy Growth Program is working and helping to reduce our green house gas emissions. We need to do more to fight climate change, not less!

I assume this repeal effort is because Rhode Islanders are concerned about the high cost of electricity. I suggest more effort should be made to develop more solar energy and offshore wind, so we can return energy dollars to Rhode Island.

I urge the committee to oppose this regressive legislation. Thank you.

Sincerely,

Joel Gates
