You don't often get email from lindstockdale@gmail.com. [Learn why this is important](#)

Dear members of the House Corporations Committee,

I live at 36 Crestwood Drive in Kingston and I am writing in support of bill H7334 that will improve conditions for parrots in captivity. Parrots are highly social, long-lived, intelligent animals. They are difficult to care for as pets because they are messy, loud and prone to destructive behavior when bored. As pets they need hours of daily human interaction, training and mental stimulation to prevent self-harming behaviors. Parrots are wild animals and should not be sold as pets. Please release bill H7334 for a vote and help with its passage.

Thank you,
Linda Stockdale
