

To the Clerk of House Committee on Corporations. 3-19-26

My name is Jessie Kingston, retired . I live in Providence.

I am writing in opposition to the following group of bills

Against

H 7139

H 7174

H 7176

H 7177

H7182

H7523

The intent of these bills is explicit: to “delay”, “limit”, “repeal”, “place a moratorium on” (and so forth) existing programs, contracts, subsidies and *mandates* which this General Assembly went through great pains, took time to study and therefore established as law . All the aforementioned programs are critical for reversing ever increasing and more harmful climate effects due to green house gas emissions. To pass these short sighted , ill advised bills, would be nothing less than a tragic mistake.
