

Testimony in support of H7269: Portable Solar Generation Devices

Barbara Walsh, 62 Frederick Street, Warwick, RI 02888

Date of Hearing: March 19, 2026

To: Chair Solomon and the honorable Members of the House Corporations Committee

This is a practical and well-thought-out bill. There are many reasons to support it. And I am certain you have received many comments denoting those reasons, so I will not repeat them, but ask that you give much consideration to the many reasons to pass this bill, as written. If we believe the value of government should be to improve the lives of its citizens without adding unnecessary interference, regulations, or barriers then this bill would support that value. Cost savings, unnecessary regulations, and government efficiency should be supported by statute. Please pass this bill and allow the House to vote on it.
