Support for House Bill No. [7269](#) Balcony Solar Bill

What this does: This bill will allow Rhode Islanders to use plug-in solar, a portable solar panel that you can simply plug into a normal electrical outlet. The bill democratizes solar energy by making it inexpensive and simple enough for people to install themselves, and thereby avoid the higher initial cost of rooftop solar. Although it will not provide enough power to run an entire house, it can dramatically reduce electric bills. It does not involve any costs to the state or to ratepayers.

Please support this bill as soon as possible for the love of Rhode Island and Rhode Islanders.

Thanks very much for helping to protect our planet. ❤️
