I support these bills.

Being a proud owner of solar panels on my roof in Hopkinton, I would like to encourage you to please support Bills H 7269, H 7727, and H 7726. Permitting fees and infrastructure costs tend to be quite bloated and increase the cost of solar. It is such common sense to encourage this “free” energy from the sun and not to be dependent on the whims, pollution, and wars associated with fossil fuel extraction, not to mention the massive subsidies fossil fuel companies receive. Let's even the playing field by subsidizing and encouraging solar energy.

Thank you
