

March 19, 2026

Rep. Joseph Solomon, Jr. Chairman, House Corporations Committee
Rhode Island General Assembly, Rhode Island State House
82 Smith Street
Providence, RI 02903

Dear Chairman Solomon and Members of the House Corporations Committee:

Of all the energy sources we enjoy, solar energy is the fastest to construct and deploy. It is clean, reliable and makes energy more affordable. I have enjoyed the benefits of rooftop solar for almost 10 years now – it is clean, dependable and keeps our energy dollars locally. It is a job creator in RI and gives our young people an opportunity for professional skills and growth in a well-paying field.

Therefore I support the bills that help to streamline the process, reduce costs, and increase solar capacity in RI. **I support H 7269 and H 7726.**

I also support H 7727 so that RI can continue to be a model for the nation on offshore wind. Offshore wind creates clean tech jobs, career paths for young people in the blue economy, and lowers electricity bills for RI energy consumers.

Thank you to the members of the House who have cosponsored these bills and to the committee members who will vote favorably on them.

Thank you for your consideration,
MJ Sorrentino
RI House District 74
