Support of House Bill No. [7727](#) Offshore Wind Study Commission Bill

What this does: Establishes an Offshore Wind Procurement Policy Study Commission to develop a clear strategy for Rhode Island to procure 1,200 MW of offshore wind by 2030. The commission would evaluate policies, procurement structures, and market mechanisms needed to support the long-term development of offshore wind in Rhode Island in a way that is cost-effective, reliable, and aligned with the state's climate and economic development goals.

Thank you for helping to protect our Rhode Island and our planet by overseeing our development of climate change-fighting wind power. ❤️
