Support of House Bill No. 7876  
BY Stewart, Tanzi  
ENTITLED, AN ACT RELATING TO PUBLIC UTILITIES AND  
CARRIERS -- AFFORDABLE CLEAN ENERGY SECURITY ACT  
(Excludes nuclear power from the office of energy resources and  
division of public utilities from participation, procuring and entering  
into long-term contracts.)

Dear Chair Solomon and members of the Committee,

My name is Camille Nixon and I live in Warren. I am submitting testimony in support of bill number 7876.

I am a grandmother who wants us to provide a healthy planet for our grandchildren and beyond. This bill is important because it stops nuclear power from creeping into our renewable resources as a "low-emission" or "zero-emission" resource. Nuclear fission may not emit carbon, but, it has unbelievably dangerous radioactive waste which will need to be contained for thousands to millions of years. Nuclear power is, also, very expensive to create, maintain, and decommission after its 60-year lifespan.

Nuclear power is not affordable and the costs are not only financial. I do not want to saddle our children with dealing with radioactive nuclear waste for their lifetimes and on and on. We know that we can get real renewable energy which is the cheapest and most reliable energy that is available locally and which would benefit Rhode Islanders with good-paying jobs and low, locally sourced energy. Let's concentrate on obtaining the real clean energies like wind and solar.

We must not let nuclear fission snake its way into our "affordable clean energy security" as it is neither affordable, clean, or secure. If we don't stop this mis-named "low-emission" resource soon, it will permeate our grid and that would be a disaster!

Thank you for considering my concerns.

Thank you for helping to protect our planet. ❤️
