**Subject:** Support for HB 7612 and HB 7880/Attn Rep. Blazejewski

Clerk Louis Mansolillo,

To Rep Blazejewski,

I am a concerned RI constituent and utility customer writing to urge you to support HB 7612 (SIPP) and HB 7880 (PIPP).

These bills are important to me because they would make utilities affordable for low-income Rhode Islanders and accessible to people with medical conditions. PIPP would also ensure a just transition to renewable energy, a much needed measure to address climate change.

Many of us are struggling with disproportionately high utility rates. We were already struggling with the cost of utilities and now with the skyrocketing cost of food, paying our rents & any other needed products for us to live and gasoline, life has become even more difficult. Being a senior, I along with countless others...families with children to support, single one income people etc, are either having to choose between paying utilities, verses having our needed meds etc.

You are described as a leader in affordability, environmental protection, public education , civil rights, services for seniors, for working families, etc. I urge you to continue that leadership by supporting policies that represent the interests of all Rhode Islanders, including low-income families.

By implementing SIPP and PIPP you would help ensure equitable access to essential utilities and demonstrate your commitment to the leadership you are known for.

There are many reasons to implement a PIPP and SIPP now.

I look forward to your response and action on these critical, life-saving bills.

Sincerely, Constance St Sauveur
