Subject: Support for Amended H8400

[You don't often get email from amytarbox401@gmail.com. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

Dear Committee Members and House Leadership,

I strongly support the proposed version of H8400 with the expiration date removed. I respectfully ask that you vote this bill out of committee and recommend its passage by the full chamber during this legislative session.

The citizens of North Kingstown do not want a sewage sludge pyrolysis plant in their community. Recent public comments have highlighted grave concerns regarding the accumulation of mercury—a known neurotoxin with long-lasting generational impacts—and benzene, an established class 1 carcinogen for which no safe exposure limit is known. With over 20 other hazardous particles and emissions documented in the pyrolysis plant's minor source air permit application, it is clear that these facilities do not belong in the middle of our homes, schools, and sole water sources. We do not need to wait on commission results to tell us this is the wrong place for this type of technology.

Beyond protecting community health, the expedited timeline and limited public comment early in this facility's process have harmed the community's relationship with the Quonset Development Corporation (QDC), an entity critical to both the town's and the state's economy.

Passing this bill without an expiration date will give the community the confidence that a new pyrolysis plant under a different LLC is not waiting right around the corner. This foundational safety step strengthens and repairs the QDC-North Kingstown relationship, which has served the state well over the last several decades.

Thank you for your time and service.

Sincerely,

Amy Tarbox

122 Shady Cove Rd. North Kingstown
