

In FAVOR of H 8519 Renewable Energy Standard 2026

My name is Jessie Kingston. I'm retired, live in Providence and am a member of Climate Action RI and Green Energy Consumers Alliance.

I wish to be counted in favor of this bill for all of the reasons in the written testimonies submitted (so far) by Dr Hans Scholl, Barbara Watts, Stacey Snow, and most of the testimony of Mr Nicholas Ucci with the exception of his close to final paragraph suggesting pushing the goal to achieve 100% out another seven long years.

My sincere thanks to Representatives Carson and Shekarchi for submitting this bill.
