"Hi there my name is Jack turkey-rookie(?) assistant principal for teaching and learning at North Kingstown High School. I'm calling in advocacy of house bill number 7561 that is scheduled for hearing today at 4:00. Referring to students taking or supporting our physical education adaptive classes and getting credits for those our general education students who are supporting our adaptive students in that class getting PE credit or a better integration and I just wanted to kinda put on the record I don't know if I got this in enough time that I am in full support as a school administrator for this bill that Ryan look of it says working on with Julie because Marrow and their team and we do feel here at the school that that would be incredibly beneficial for our students and a great inclusion opportunity for them as well if I still able to send in a letter please let me know and I'm happy to do so. My direct line is 401-268-6289. Thank you so much have a great day."
