

Hi my name is Joshua Homerston, I am Lead custodian/local 855 union president for the RI scituate school district custodians. I am writing this letter today to support the bill 5422 that is being heard today. I believe this program will be helpful in reducing food waste and recycling going to the landfill. I believe having a certified environmental custodian is essential to keeping the programs running smoothly and health and safety of all staff and students. Also I believe the bill will be great for the students to learn more about composting and recycling for the future. Please consider putting this bill through. Thank you for your time.
