

House bill 2025 -- H 5836

Hello,

I am writing in regards to the house bill concerning ethnic studies curriculum in the Rhode Island schools.

While I am in favor of a curriculum concerning marginalized groups, I find it deeply concerning that Jewish Americans have been left out of this course of study.

Jews are a recognized ethno-religious group who have faced much persecution worldwide but also in the United States. Including but not limited to rejection as immigrants based on their identity, refusal from places of business and housing similar to segregation rules in the 50s and beyond and quotas in places of work, and higher learning institutions.

I sincerely hope if you want this curriculum to be a full and complete study of marginalized communities throughout the world and US history, you will amend this bill to include Jewish Americans in the course study.

Thank you
