Patricia Cole, Narragansett 02882

I am in favor of H5604 which broadens the scope of sex education in schools grade 6-12 to include all sexual orientations and preferences. The exclusion of individuals who are not main stream binary has done great harm to the self image and confidence of such individuals.

I see no reason to oppose this legislation especially since parents/guardians have the opportunity to view the curriculum beforehand and make the decision to exempt their child from attendance.

Respectfully, Patricia Cole
