Subject: Passage of H 7295

Hello, I am a citizen of Illinois and I have personally witnessed solar geoengineering all over the state. Aircraft of all different shapes and sizes has emitted what appears to be fumes into the air which then form clouds which block out the sun. I have feared going outdoors and my children who have asthma can not even go outside to play because of this added layer of what appears to be pollution in our Earth's atmosphere.

I am in total support of the passage of H 7295, and I am emailing this note of thanks and support in favor of The Rhode Island Clean Air Preservation Act.

I hope that all states will say NO to solar geoengineering and YES to clean energy moving forward.

Signed, a concerned citizen.
