

**My name is William Losefsky and this testimony is in support of H 7295.**

I am a retired law enforcement officer and upon retiring I became a Corporate Security and Environmental Health and Safety Director for several large hospital systems, as well as a private investigator. I also have advanced education in Industrial Hygiene management. This unique background has provided me the skills of a lifelong and articulate skilled investigator with a keen scrutiny for details.

Moreover, I have protected our most valuable resource, our citizens for my entire career and adult life. I am now looking for you, our honorable representatives of Rhode Island to protect our citizens with the wisdom and power you possess.

Please help us cease and desist the pollution of our atmosphere by prohibiting the intentional release of polluting emissions, including cloud seeding, weather modification, excessive electromagnetic radio frequency, and microwave radiation pollution and making penalties for violations of such prohibition.

There is much substantiated evidence that this practice is both ongoing and has been in place for many years.

I will refer to The White House document named “Congressionally Mandated Research Plan and an Initial Research Governance Framework Related to Solar Radiation Modification” this document clearly states that the practice of weather modification is happening without the people’s consent. On Page 21 of the document reads:

The effort to design, plan, coordinate, and execute these outdoor experiments is a multi-disciplinary, multi-year activity involving scientists, engineers, and technicians and one that spans multiple institutions and agencies”. In this instance SAI experiments of interest is how aerosols are formed and evolve in the real stratosphere in response to the injection of sulfur dioxide. Sulfur dioxide is a hazardous and toxic gas.

I will again refer to The White House document named “Congressionally Mandated Research Plan and an Initial Research Governance Framework Related to Solar Radiation Modification as it clearly states that the practice of weather modification is happening. To support that this is happening please review this link, <https://csl.noaa.gov/projects/sabre/wb57/payload.html> You will notice mention of SABRE and you will see a list of the payload and which agency is supplying each. Note the date on the document of 2022 and 2023.

Please also take notice that depicted in the 2024 Federal Budget where millions of dollars have already been approved for years out in order to continue exposing all of us, our animals and our crops, not to mention the wild life to these polluting interventions.

<https://www.congress.gov/118/crpt/hrpt126/CRPT-118hrpt126.pdf>

The US constitution's Tenth Amendment states that "Most power and authority remains with the states; either with the state governments or with the people themselves as they determine in each state". The Tenth amendment protects us from the federal government's oppressive and destructive overreach.

Moreover this entire state of Rhode Island never gave consent to be exposed to this sort of Pollution. H 7295 is a simple matter of Governance, considering that per the White House document itself, Governance and Policy of Weather Modification and Experimentation is already in existence. We are very fortunate to be living in the state of Rhode Island where being informed and being an active participant in the governance process as described both in the Constitution of the United States of America, and also described in The Rhode Island Constitution.

We can keep Rhode Island, with it's people and natural beauty and historic background, valuable resources, preserved for generations to come.

I have been in contact with the state police command staff, both telephonically and through email, and we discussed their role in regards to H 7295. We have established a clear and open dialog together.

H 7295 is about Pollution, Consent and Governance. I trust that all of us here want the protection that this bill gives us. We as a state must come together to pass H 7295 into law.

In closing, Every Police Academy has a motto on a guidon flag that is carried wherever the Academy class goes. My Academy's motto was "Knowledge is Power". I have used that motto my entire life and now you honorable representatives now have both the knowledge and the power to protect the citizens of Rhode Island.

Rhode Island may be a small state in land mass, but one fact is for sure, we won't remain silent when are rights are attacked, nor stifled or trifled with, when it comes down to the protection of the citizenry of this great state.

Let us be a leader in passing this bill.

Thank you.

William Losefsky
