

Testimony in support of H7783: Pesticide Control

Barbara Walsh. 62 Frederick Street, Warwick, RI 02888

Date of Hearing: April 4, 2024

To Chair Bennett and the honorable Members of the House Environment and Natural resources
Committee:

This is a critical bill for the safety of birds, other wildlife, and domestic animals. Given there are alternatives to the use of these poisons, it makes sense and is reasonable to prohibit the pervasive use of deadly, cruel, and unnecessary poisons.

Please support this bill.
