Subject: Testimony on H 5074

Members of the House Committee on the Environment, There are a number of wasteful practices that create massive amounts of trash in RI. The legislature should be setting a proper example for the people of RI and eliminate its own trash to the extent possible. H 5074 calls for an audit of the legislative trash by RIRRC. Doing this, and implementing its recommendations would go a long way towards helping eliminate the scourge of trash throughout the state. Please support H 5074. Greg Gerritt Providence RI
