

Testimony in support of H5166: High Heat Waste Facility Act;

Date of Hearing: March 12, 2025

Barbara Walsh, 62 Frederick Street, Warwick, RI 02888

To: Chair Bennett and the honorable Members of the House Environment and Natural Resources Committee:

This technology is dangerous for our environment. It is time to prohibit it and stop wasting legislators and advocate's time in fighting against it. Please pass this bill out of committee and allow the full House to vote on it – it's time.

Barbara Walsh
