Subject: Testimony on H 6059

Members of the House Environment committee,

I write to oppose H6059. The proposed amendment to last years PFAS ban is a step backwards. It makes it easier to introduce PFAS into the RI environment. The Federal government is rudely being dismantled with one of the express purposes being that it should be easier to pollute. Considering that PFAS is dangerous in even the most minute quantities following new federal guidelines will make it easier to pollute in RI and much more likely that people will get sick. Please stand up for the rules that RI passed just last year and keep PFAS out of any products that make it easy for PFAS to get into the bodies of Rhode Islanders. Please reject H 6059.
