**Testimony**  
**General Comments on**  
**House Bill 6205**

**EXTENDED PRODUCER RESPONSIBILITY FOR PACKAGING AND PAPER ACT**

**House Committee on Environment and Natural Resources**  
**May 13, 2025**

Chair Bennett, Vice Chair Phillips and Members of the House Committee on Environment and Natural Resources.

AMERIPEN – the American Institute for Packaging and the Environment – appreciates the opportunity to submit written testimony on House Bill 6205 that would create an Extended Producer Responsibility (EPR) program for packaging and paper products. AMERIPEN has strong principles (see attached) for effective packaging EPR and financing programs to improve recycling and has been a leading voice on EPR proposals and laws across the country. While we understand the desire to move forward with EPR in HB 6205, and also consideration of a bottle bill, we encourage further stakeholder engagement around the right approach for Rhode Island.

AMERIPEN is a trade association dedicated to improving packaging and the environment. We are the only material-inclusive packaging industry trade association in the United States representing the entire packaging supply chain. This includes materials suppliers, packaging manufacturers, consumer packaged goods companies, and end-of-life materials managers. Our membership also includes a robust array of industry, material, and product-specific trade associations who are essential to the AMERIPEN fabric. We focus on science and data to support our public policy positions, and our advocacy and policy engagement is based on rigorous research rooted in our commitment to achieve sustainable packaging policies. We have several member companies that manufacture packaging components in Rhode Island, and many more who import packaging materials and products into the State. The packaging industry supports more than 5000 jobs and accounts for more than \$1.3-billion in total economic output in Rhode Island.

AMERIPEN acknowledges that EPR programs can be a useful policy mechanism to help achieve environmental goals and reduce waste by bolstering recycling programs. The packaging industry understands the value of properly designed EPR programs and their potential to improve the recycling system. However, given recent discussions around a bottle bill and the report from the *Special Joint Legislative Commission to Study and Provide Recommendations to Protect our Environment and Natural Resources from Plastic Bottle Waste* - we believe a broader engagement of stakeholders is needed around the right set of recycling policies for Rhode Island. Should EPR be considered, a similar evaluation of the benefits and unique aspects of the State, with all stakeholders would be needed to support a packaging and paper EPR program in Rhode Island. Additionally, performance of a Needs Assessment or a study of current recycling rates and performance data would be helpful to inform a proper approach that would improve recycling. AMERIPEN has participated in these types of extensive dialogues that have occurred in states like Minnesota, Maryland, Illinois and Washington that have led to the performance of Needs Assessments and recycling studies that have or are leading to more informed policy creation. These studies have identified the current capacity, infrastructure and challenges that exist in each state and have served as a useful tool in looking at recycling policy and EPR.

We hope that our comments are constructive to the Committee and that you might consider an additional Commission to specifically look at EPR or a consider supporting a needs assessment for the recycling system. A needs assessment could serve as the basis for what specific characteristics of Rhode Island's recycling system need to be considered, before putting an EPR or bottle bill program in place. We look forward to continuing discussion with the Committee on this important topic. Please feel free to contact
