Re: H-6287

Dear members of the House Environmental Committee:

This bill is long overdue and much needed. Nano and micro plastics are everywhere - wreaking havoc in the animals of the oceans and invading human semen, breastmilk and even crossing the blood-brain barrier*. Please do the right thing and pass this bill, even though those who profit from plastics may pressure you.

Thank you for your courage in this matter.

Barbara Hunger

5 Thurston St

Prov. 02907
