Subject: Voicing support for the new RI bottle bill (House Bill H6207)

Dear Mr. Mansolillo,

I'm writing to voice my support of the new RI bottle bill (House Bill H6207).

Single-use beverage containers are a massive litter and waste problem. Plastic beverage bottles clog storm drains, float into rivers and streams, and break down into microplastic bits that pollute the Bay. And many beverage containers of all materials never get recycled because there wasn't a convenient option to recycle them or because they were too contaminated from being collected in our mixed curbside program.

Bottle bills work. For over a year, environmental groups, elected officials, and stakeholders studied solutions to beverage bottle waste and pollution. The study commission heard from recycling experts from around the country, examined data from other states, and dove deep into our own Rhode Island recycling and waste systems. It's now clearer than ever that bottle bills work to reduce litter and improve recycling.

Senate Bill 996 by Sen. McKenney and House Bill 6207 by Rep. McEntee reflect the recommendations of the study commission to create a Deposit Return System for beverage containers and a producer responsibility program for other forms of packaging. These systems would be paid for by producers and have no impact on the state budget and create a world-class recycling system that both reduces litter and improves recycling. Please support S996 and H6207.

Thank you for taking the time to listen to your constituency.

Sincerely,
Faye Dvorchak
Cranston, RI
