Support for **House Bill No. 7184**

Building Performance Standards Act of 2026

Dear Chair Bennett and members of the Committee:

I support this bill because, as a grandmother who wants to leave this planet in livable condition for my grandchildren, I feel that we need to reduce energy consumption and switch our energy resources to center on real renewables, (not nuclear fission which emits extremely dangerous radioactive nuclear waste, however.)

This bill is extremely important because it requires large developments to provide a carbon impact report as part of the permitting process, prior to approval of a building permit. The goal is to assess the building's energy use and whether it will meet the emissions requirements of the state's Act on Climate. The bill includes a waiver process if it proves impossible to design the building to meet those standards. Exemptions are also available for hospitals, medical facilities, restaurants, and others.

Please support this bill so we can meet our Act on Climate goals.

Thank you for helping to protect our planet. ❤️
