

Testimony in Favor of H 7184 Building Performance Standards

My name is Jessie Kingston. I'm retired and live in Providence.

I am in wholehearted favor of this, one of Climate Action Rhode Island's priority bills this year.

Whereas the most recent EC4 report did not offer any specific suggestions, as required of their assessment, the implementation of the components of this bill are a perfect example of a feasible, specific strategy to help Rhode Island meet the requirements of the Act on Climate.

Thank you to the sponsors of this bill for introducing it .
