Subject: Support of House Bill No. 8132 Decarbonization Demonstration Initiative Act of 2026

Support of **House Bill No. 8132**

Decarbonization Demonstration Initiative Act of 2026

Dear Chair Bennett and members of the Committee:

Please support this bill as decarbonization is instrumental in fighting climate change. As a grandmother wishing to leave a healthy planet for our grandchildren, I implore you to do all you can to keep up the fight alongside our RI Act on Climate.

This bill would establish funding for pilot projects designed to explore the feasibility of geothermal energy for large apartment buildings and multi-family housing developments. Geothermal is another clean and renewable energy which would be fabulous if we could employ alongside other alternative energies to help us to fight climate change.

Thanks for helping to protect our planet.
