Dear Committee Members:

I support

House Bill No. [7004](#)

RI Climate Superfund Act of 2026

because this bill would require Big Oil companies to help our state adapt to the climate crisis they knowingly caused. The Act would take the burden off Rhode Island taxpayers and make polluters pay — requiring large fossil fuel companies to pay for cleanup and damages they have caused in Rhode Island based on their carbon emissions over the last three decades. Vermont, New York, and Maryland have passed similar legislation.

Please support this bill because it is the right thing to do.

Thanks very much,

Camille Nixon
