I'm writing to urge support of HB 7004 and 7081 which support our climate and to oppose HB 7531 which will actually cause harm.

We are all passionate about so many causes and yet taking care of our earth needs to be first and foremost. If we don't take environmental issues seriously and really work for change, nothing else really matters does it? We're killing that which sustains us.

Please be good stewards and help our earth survive.
