Dear Committee Members:

I support

House Bill No. [7912](#)

RI Clean Heat Standard Act

because this act would implement a system of tradeable clean heat credits earned from the delivery of clean heat measures that reduce greenhouse gas emissions, requiring heating suppliers to gradually phase out their use of fossil fuels and gradually increase the clean heat services they provide.

As a grandma, I take seriously what science tells us: We must stop burning fossil fuels as this pollution is killing our planet. I must ask you to take this warning seriously and support the phasing out of the use of dirty fossil fuels in favor of clean renewable energies like wind and solar. For the sake of our kids and our planet, please work towards protecting our planet. Please support this bill.

Thank you very much,

Camille Nixon
