Subject: Natural Forest Protection Act

You don't often get email from rollingfishhead@cox.net. [Learn why this is important](#)

Dear Mr Mansolillo,

The about act would create the necessary protections for our state-owned land to prohibit clearcut logging and require environmental review by Natural Heritage Program scientists. Once the trees are cut down all Rhode Islanders will never know the wonderment of old growth trees. Trees are the lungs of the earth -they depend on our protection!!!!!!!

Thank-you,
Pam Purvis
