Testimony in support of H8415: Plastic Waste Reduction Act

Camille Nixon, Warren, RI 02885

Date of Hearing: May 19, 2026

To Chair Bennett and the honorable Members of the House Environment and Natural Resources Committee:

I agree with my friend Hans Scholl who writes:

"I support the bill because it would prohibit the use of the black (i.e. recycled polypropylene or mineral-filled polypropylene) takeout containers that are currently in prolific use.

There are compostable alternative containers available as a better alternative that is already used by a number of restaurants like Plant City, so moving towards these containers presents no hardship and reduces plastic trash.

Please bring the bill to a vote in 2026.

Thank you very much for considering my input, and thank you to Representative Bennett for introducing this important bill."

Thanks for helping to protect life on our planet. ❤️

Camille Nixon
