Subject: Testimony in support of H 5923

To Chairman Bennett & members of the committee,

I hope you will strongly support passing H 5923 by Rep. Caldwell, especially in light of the new proposed facility in the Kent County region of my home of Warwick, as well as the neighboring communities of East Greenwich & Coventry. The proposed host community of West Warwick is already a community where the former presence of heavy industry pollution has left the natural environment devastated. Creating a new high-heat medical waste recycling facility is also the last thing we should be doing as we attempt to boldly and aggressively confront the existential threat to Rhode Island that is climate change. If you need any more convincing, you should immediately watch the recent DEM hearing held on considering permitting the new facility, where opposition was all but unanimous save for the owner of the company seeking the permit. Please swiftly pass this bill.

Thank You,

Jordan Goyette
