Subject: Medical Waste Recycling Facility in West Warwick Opposition to the Measure

This High Heat Recycling technology, has not been proven to be safe any where in the US.

This technology has not received the proper vetting through the DEM.

This technology is being quietly pushed through the DEM without proper review and/or authorization so someone can make a quick buck, without regard to the health of the surrounding community.

Where are the environmental impacts studies for air quality, water quality, storm water quality, traffic and noise concerns?

A concern citizen
