Re: **Support for House Bill 6047**

On behalf of our network of member agencies and SOAR, our taskforce of survivors, the Rhode Island Coalition Against Domestic Violence (RICADV) appreciates this opportunity to express our **strong support for House Bill 6047**. This legislation would require all health insurance contracts effective on or after January 1, 2026, to cover FDA-approved contraceptives, sterilization, contraception counseling, follow-up services, and a twelve-month supply for Medicaid recipients.

Restricting any access to reproductive health services and choices places particularly dangerous burdens on victims of domestic and sexual violence. Victims of domestic violence are at a significantly higher risk for unintended pregnancy because partners who use violence will often sabotage or interfere with their partner's birth control in an attempt to exercise control over their reproductive decisions. In a 2010 study conducted jointly by the University of California-Davis School of Medicine and the Harvard School of Public Health, researchers found that at least 35% of domestic violence victims reported reproductive control by their abusive partner either by contraception interference or coercion to become pregnant.¹

Restrictions that complicate access to contraception, or which make such access prohibitively expensive, provide additional leverage for people who use violence to use in order to threaten, trick, or intimidate their victims into continuing with an unwanted pregnancy. The legislature should act to ensure that all Rhode Islanders, regardless of their health insurance carrier, have safe and affordable access to the reproductive health and contraception options they need. This will deter and prevent unintended pregnancies by at-risk domestic violence victims who face additional danger when a pregnancy is added to a violent and abusive relationship.

Thank you for your consideration of this important legislation. We urge you to **support House Bill 6047**.
