

Good Afternoon,

I am writing in support of passage regarding the CTE Bond. As the former Executive Director of RIMA, I have been a strong advocate for support of our CTE schools and various Programs. I was on the CTE Board and I am currently serving on the Davies Vocational Board. The students who are part of the CTE programs are actively involved in their pursuit of a career. The future is CTE training. In the manufacturing sector we have a serious shortage of trained machinist due to a aging workforce. I urge you to support this bond as our future is in the high school students and they are the next generation to drive our economy.

Thank you,

-Dave
