

Dear Mr. Chairman and Committee members,

I am writing in support of H 8144, which would add \$7 million to the 2026 Green Bond for the preservation of open space and farmland.

I am happy to see that money allocated for logging on state land is not included in this bill unlike previous Green Bond bills.

My only recommendation is that any land acquired for open space be preserved in the state it was acquired. Not logged shortly before or after acquisition.

Thank you,

Nathan Cornell
