Dear Representative Abney and Honorable Committee Members, I am writing in support of Bill H8298, a bill supporting bicycling infrastructure, not just because I am a bicycling enthusiast, but because of the challenges that humanity is putting on our planet. As the current administration in Washington takes us backwards in our protection of mother earth, it is important for state legislatures to do what they can to protect our resources.

Please pass Bill H8298 and help us take this relatively small step towards a safer planet.

Sincerely,

John Blakeslee
