Chairman Abney and Honorable Members of the House Finance Committee,

I am writing on behalf of myself and as a member of our town's BPAC to express **my** strong support for H8298, the proposed bond measure to fund the implementation of the Rhode Island Statewide Bicycle Mobility Plan and completion of bike paths across Rhode Island. It has been 8 years since we last included funding in our Green Bond, and when asked, voters overwhelmingly supported the investment, with 78.9% voting yes.

Safe, well-connected bicycle infrastructure is a sound public investment. Rhode Island's communities stand to benefit in multiple ways: reduced traffic congestion, improved air quality, stronger public health outcomes, and increased economic activity along active transportation corridors. Studies consistently show that every dollar invested in bike infrastructure yields significant returns through tourism, local business activity, and reduced healthcare costs.

Rhode Island already has some bike paths but no nearly enough. Bike paths near Portsmouth are almost overcrowded indicating a strong vote of approval on the part of the residents. Dedicated bond funding would allow the state to close critical gaps in the network, improve safety at dangerous intersections, and expand access to communities that rely on cycling for everyday transportation, as well as those of all ages who use it for recreation.

We urge the Committee to support H8298, adding this component to the Green Bond question in 2026 and give voters the opportunity to once again invest in bike paths and in Rhode Island's future — one that is healthier, greener, and more connected.

Thank you for your consideration.

Sincerely,  
**Nick Del Greco**
