RI House Finance Committee Members,
I urge you to support H8174 and H8175.

Midwifery care and lactation support have been shown to improve health outcomes of the communities they serve. Limiting access to these services is unconscionable, especially in light of well-documented health disparities across the country, including our state. Systematic incorporation of these services at a state level will move us toward the equity we should be seeking in RI's maternal and child health.

H8174 and H8175 provide us opportunities to make a real difference.

Please vote yes.

Sincerely,
Stephanie Avila, CNM
