

To whom it may concern:

As a property owner who has a farm exemption as well property under forestry management, we believe equipment and parts for forestry operations should be considered tax exempt.

Any operation under the umbrella of the USDA and/or the NRCS should be supported accordingly. Forestry operators provide a valuable service to agricultural and forestry management practices. Their efforts go hand-in-hand with the success of our conservation activities and agricultural and forest products.

Therefore, we are in support of Bill 8152 up for consideration.

Best Regards,

Dr. & Mrs. Mark Lyles
